

November 2, 2015 marked the end of the first compliance period of Québec's cap-and-trade system for greenhouse gas emission allowances (C&T system). It was the first time companies subject to the Regulation respecting a cap-and-trade system for greenhouse gas emission allowances (C&T system), also known as *emitters*, had to surrender to the Government of Québec sufficient emission allowances to account for every ton of CO<sub>2</sub> equivalent emitted by their covered establishments for the years 2013 and 2014.

The following compliance report presents data on how emitters complied with their obligations for the first compliance period. Table 1 shows, among other things, a summary of the total number of emitters subject to a compliance obligation and the quantities of allowances they surrendered. Table 2 describes how each of these companies complied with their obligations by showing what they surrendered to the government in terms of emission allowances and offset credits, if applicable.

## Report on the 2013-2014 Compliance Period of the Québec Cap-and-Trade System for Greenhouse Gas Emissions Allowances (C&T system)

Report generated on December 3, 2015

**Table 1 - Summary Report**

Emitters			Emission allowances								
Number of emitters for the 2013-2014 compliance period	Number of emitters that met the compliance obligation <sup>1</sup>	Percentage of emitters that met the compliance obligation (%)	Total of covered emissions (tons of CO <sub>2</sub> e)	Total of emission allowances surrendered	Percentage of emission covered by emission allowances (%)	Allowances 2013	Allowances 2014	Early Reduction Credits	Offsets Credits	Percentage of Offset Credits (%)	
Québec	55	55	100	36 664 703	36 664 703	100	18 371 894	16 043 320	1 950 677	298 812	0,8

Notes: 1 An emitter that met its compliance obligation is known to have surrendered enough eligible emission allowances to account for all of its greenhouse gas emissions over the first compliance period.
